

REMARKS

In the Official Action mailed on **19 September 2006**, the Examiner reviewed claims 1-14. Claims 8-14 were rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter. Claims 1-6, and 8-13 were rejected under 35 U.S.C. §102(b) as being anticipated by Thatte et al (USPN 6,442,620, hereinafter “Thatte”). Claims 7, and 14 were rejected under 35 U.S.C. §103(a) as being unpatentable over Thatte in view of Gibbons et al (USPN 5,761,511, hereinafter “Gibbons”).

Rejections under 35 U.S.C. §101

Claims 8-21 were rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter.

Applicant has amended paragraph [0024] of the specification to remove the non-tangible embodiments of the computer-readable storage medium. Additionally, applicant has amended independent claim 8 to delete the previously added limitations as being redundant.

Rejections under 35 U.S.C. §102(b) and 35 U.S.C. §103(a)

Dependent claims 4 and 11 were rejected as being anticipated by Thatte. Examiner avers that Thatte discloses “providing an additional factory for an extended component of the first invocation” at col. 11, lines 9-22). Applicant respectfully points out that Thatte teaches an **extensible object execution environment** (see Thatte, col. 11, lines 9-22).

In contrast, the present invention generates an additional unique **factory for building extensions** of components (see paragraph [0028] of the instant application). This is beneficial because using a unique factory for building extensions of a component eliminates potential problems with initialization circularity. There is nothing within Thatte, either explicit or implicit, which

suggests generating an additional unique factory for building extensions of components.

Accordingly, Applicant has amended independent claims 1 and 8 to include limitations from dependent claims 4 and 11, respectively, to clarify that the present invention generates an additional unique factory for building extensions of components. These amendments find support in paragraph [0028] of the instant application

Hence, Applicant respectfully submits that independent claims 1 and 8 as presently amended are in condition for allowance. Applicant also submits that claims 2-3 and 5-7, which depend upon claim 1, and claims 9-10 and 12-14, which depend upon claim 8, are for the same reasons in condition for allowance and for reasons of the unique combinations recited in such claims.

CONCLUSION

It is submitted that the present application is presently in form for allowance. Such action is respectfully requested.

Respectfully submitted,

By
